DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2002/0111892 *Sharp et al* in view of US 6,202,051 *Woolston*.

As to Claim 4, *Sharp* discloses the invention substantially as claimed including in a method for aligning transactional flows within an Internet exchange portal, comprising the steps of:

- collecting a set of shipping data for shipping between the buyer and seller (para. 74);
- soliciting bids for shipping services required by a contract (paras. 113, 121);
- receiving a set of shipping bids (para. 111); and
- selecting a bid from the set of bids according to a predetermined set of bid evaluation criteria (paras. 112-119).

Sharp does not specifically disclose that the shipping services are obtained for a contract entered into between the buyer and seller as a result of an auction. *Woolston* discloses that shipping services are obtained for a contract entered into between the buyer and seller as a result of an auction at Col. 12, lines 30 to Col. 13, line 31 and Col. 10, line 43 to Col. 11, line 38. It

Art Unit: 3624

would have been obvious to one of ordinary skill in that art at the time of the invention to modify *Sharp* to provide shipping for goods sold at the auction of *Woolston* because this would provide a cost effective transport services at a lowest cost to buyer and seller.

With respect to Claim 5, *Sharp* discloses business-to-business auction at para. 005.

With respect to Claim 6, *Sharp* discloses a contract consummation event at para. 115. *Woolston* discloses an auction service fee at Col. 21, lines 55-57. It would have been obvious to one of ordinary skill in that art at the time of the invention to modify *Sharp* to include the auction service fee of *Woolston* so as to compensate the entity providing auction services.

Concerning Claim 7, *Sharp* discloses the recited limitations at paras. 111-114.

With respect to Claim 8, Official Notice is taken that the grouping of contracts for transportation (loads) is old and well known the freight transport. For example, a shipper having a standard fifty-three foot trailer would transport loads to a common destination from multiple parties, rather than shipping a single small load which would use only part of the trailer capacity. It would have been obvious to one of ordinary skill in that art at the time of the invention to modify *Sharp* to group such loads and auction grouped contracts to more efficiently and profitably match customers and shippers.

Regarding Claim 9, *Sharp* discloses a plurality of shippers at Summary of the Invention, particularly paras. 17-18.

Concerning Claim 10, *Sharp* discloses a predetermined set of shipping data at paras. 16, 21 and 24.

With respect to Claim 11, *Sharp* discloses seller bid evaluation criteria at paras. 110-112.

With respect to Claim 12, *Sharp* discloses selection by a seller from among forwarded bids at para 114.

With respect to Claim 13, *Sharp* discloses selecting the bid with the lowest shipping price at para. 111.

Concerning Claim 14, Official Notice is taken that a default selection absent an exact match was old and well known at the time of the invention. For example, selection of a “closest match” selection was known. It would have been obvious to one of ordinary skill in that art at the time of the invention to modify *Sharp* to select a default shipper in the absence of a match to a predetermined criteria because this would assure that although sub-optimal, the selection would at least assure that shipping was accomplished.

Concerning Claim 15, see the discussion of Claim 4; it is inherent that capacity available for providing shipping services would be unused. One could hardly offer already used capacity.

Concerning Claims 16-26, see the discussion of Claims 4-14, of which they are computer-usable medium variants and are rejected in a like manner.
